Claims 1-4 and 7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sheldon (3,417,745). Sheldon, in figure 4, discloses shaft (the combination of parts 2 and inflation channel 56, the inflation channel best seen in figure 3A) which is rigid (col. 2, lines 39-40 and 60-63) and inflatable bladder 57 which has the shape of a wedge upon inflation (as seen in figure 4, noting that bladder 57 tapers in the proximal direction). Alternatively, it would have been obvious that the inflatable bladder 57 has the shape of a wedge since it tapers in the proximal direction. As to claim 2, Mylar (col. 8, lines 55-58) does not stretch when fully inflated. As to claim 7, Sheldon discloses cannula 5.

Applicant's arguments with respect to claims 1-4 and 7 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this

action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
